Evaporation Cooler Lacing Instructions

Slip your cover over you cooler with the open corner of your cover away from the prevailing wind and weather direction.

Tie the two cords in the bottom hem together.

Tie the other cord to the top black ring. Run the cord down to the other ring and tie a knot to that ring.

Repeat with the other rings down to the bottom. Tie the bottom of the rope to the bottom hem cord.

NOTE: To further close the cover and to keep your cover on your evaporative cooler in windy conditions we recommend that you purchase Evaporation Cooler Cover Straps.
